

Week 13 Report

Subject: Fabric Experimentation and Learning Environment (FELE) April 14th to April 20th weekly report

Authors: Sooraj Sivadasan Nair, Thomas Pulickal Joseph

Body:

In the 13th week, Ramachandra and Sesha worked on the changes in local org API. The team presented the FELE Poster on April 19th. Fele Organization was added inside the network and fele users were added inside Fele Organization. When Fele Users are enrolled, they are automatically added inside the Fele organization. "add_feleUsers", a new functionality was added in channel script. This function will add fele users inside the organization in the channel document so that only those fele users will be able to access the channel. This implementation was done by Thomas and Shiva. Sooraj and Preethi worked on creating modal screens for the client application. These modal screen prototypes were created using Figma.

Accomplished Tasks:

1. Changes done in local org API.
2. Poster was presented on April 19th.
3. Developed Modal Screen prototypes in figma.
4. Fele Organization was created inside network.
5. Fele Users were added inside Fele Organization.
6. add_feleUsers function was implemented in channel script.

Planned Tasks:

1. Finalize the client application.
2. Finalize the register and enroll fele user endpoints.
3. Start preparing for the final presentation on April 25th.
